Profile

Objectives: To be able to apply and contribute my skills and knowledge in my field and for the development of the company.

Front End Web Designer with expertise in HTML, CSS, JavaScript, and responsive design to create accessible and high-performing web interfaces. Proven ability to enhance user engagement and site usability through cross-browser testing and collaboration with UX and development teams. Focused on driving innovation and delivering seamless digital experiences that meet evolving client needs.

Area of Expertise

- WordPress Design (Beaver Builder)
- Adobe Photoshop (Graphics Design)
- Adobe XD (Web Design)
- Adobe Premiere Pro (Video Editing)
- HTML, CSS, Javascript
- Adobe After Effects
- Elementor (Block Builder)
- Adobe Illustrator (Graphics Design)
- (Video Editing)

Professional Experience

Web Designer at Tribute Technology

United States, Jan 2023 to Present

- Design and develop responsive websites and landing pages using Duda, inhouse site builder, HTML, CSS and JavaScript/jQuery.
- Create high-fidelity mockups and prototypes in Adobe XD; produce logos and graphics in Illustrator and Photoshop.
- Manage website content and updates through CMS platforms (Umbraco, CFS, WordPress) and FTP.
- Optimize SEO and page speed through image compression, caching and meta tag improvements to improve load times and search visibility.
- Coordinate with developers and lead task distribution to ensure timely delivery of client requests and maintain quality standards.
- Edit and produce web video content using Adobe Premiere Pro.

Quality Assurance Specialist at Oom Pte Ltd.

Singapore, Jan 2022 to Jan 2023

- Performed comprehensive QA for beta, staging and live websites, ensuring functional stability and content accuracy before release.
- Conducted cross-browser testing (Chrome, Edge, Firefox, Safari) and responsive/compatibility testing using BrowserStack to ensure consistent user experience across devices.
- Executed functionality checks including form submissions, SQL verification, and dummy content validation; used Screaming Frog and broken-link checkers for site integrity.
- Documented bugs with clear reproduction steps and screenshots; tracked issues and progress in OrangeScrum and coordinated closely with developers during fixes.
- Prepared website manuals and performed final quality checks on live sites to confirm successful deployments and ongoing reliability.

Quality Assurance Analyst at Design Source Media

United States, June 2020 to Dec 2021

- Participated in project discovery and reviewed SDLC artifacts and wireframes to identify inconsistencies and suggest usability improvements.
- Performed visual and functionality testing, created detailed defect reports and coordinated remediation with developers to improve release quality.
- Conducted UAT and end-to-end user testing, producing comprehensive test reports that informed prioritization and fixes.
- Provided client support through Freshdesk—handling tickets and calls, troubleshooting websites and managing content updates.
- Maintained monthly site backups and backend updates; performed routine maintenance and basic WordPress design/development using Beaver Builder and Elementor.

Education

Bachelor Degree - Major in Electronics

Technological University of the Philippines

Jan 2013 to Jan 2014

BS-EsET (Electronics Technology)

Technological University of the Philippines

Jan 2007 to Jan 2011
